Subject: South 4 Group - Reporting Period #12
Attachments: ATT00001.txt; Air_Monitoring_RP12.xlsx; TPC AIR MONITORING MAP - RP12_rev1.pdf

Good morning,

Please find the attached map and data table for reporting period 12.

EPA conducted **handheld air monitoring** from December 8, 2019 at 06:00 to December 9, 2019 at 06:00 at 113 locations in the communities surrounding the TPC Group facility in Port Neches, Texas. The air monitoring results were reported below the screening level at all locations for particulates, total volatile organic compounds (VOCs) and 1,3-butadiene.

EPA conducted **surface water sampling** on December 8, 2019 and collected 7 water samples at 6 sample locations. The surface water samples were collected along the Neches River and in canals to the southeast of the site and will be analyzed for per- and polyfluoroalkyl substances (PFAS), volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), total organic carbon (TOC), glycols, and oil and grease. The results from the sampling event will be compared to the TCEQ Surface Water Quality Standards (WQS), or to TCEQ Texas Risk Reduction Program surface water protective concentration levels (PCLs), if a WQS was not available for a chemical.

ASPECT did not fly during this reporting period.

Thanks,

David Cook
